Title : Nutraceutical for the prevention and treatment of cancers and diseases affecting the liver.

Abstract : A composition comprising vegetable/herbal based dietary ingredients, or extracts, which contains vitamins and nutrients that provide a novel nontoxic treatment for liver cancers, hepatitis, and liver cirrhosis. The composition can be taken as a daily dietary supplement to enhance normal physiological functions of the body. The said composition, or extracts thereof, are useful and effective in the treatment and prevention of liver and possibly other cancers. The compositions are also useful for administration to patients with pre-existing hepatitis and/or liver cirrhosis. The compositions or extracts thereof may be useful for treating other cancers

and other disorders, diseases, or conditions.

Patent Number:- 8202906

Title:- Use of docosahexanoic acid as active substance for the treatment of lipodystrophy.

Abstract:- Use of an extract of animal, plant or microorganism-produced origin comprising docosahexaenoic acid as active substance for the manufacture of a medicament for the treatment of lipodystrophy in a mammal. The medicament is administered to a patient who is concomitantly receiving a highly active anti-retroviral therapy (HAART). The treatment is effective and overcomes the disadvantages of current lipodystrophy treatments in HIV-infected patients.

Patent Number:- 8513456

Title:- Method for producing a carnosic acid-rich plant extract

Abstract:- A carnosic acid-rich plant extract can be produced by extracting a dried and comminuted plant material containing carnosic acid with supercritical CO2 at a pressure of at least 200 bar and at a temperature of at most 100° C. In a first step, supercritical CO2 in a quantity of 10 to 50 kg of CO2 per kg of plant material is passed through the plant material to obtain a first CO2 extract. In a second step, additional supercritical CO2 is passed through the plant material to obtain a second CO2 extract, and a carnosic acid-rich plant extract is separated from the second CO2 extract by lowering the pressure.
